

HEPATITIS C

DID YOU KNOW?

CDC | <https://www.cdc.gov/hepatitis-c/prevention/>

Any equipment used to prepare drugs can spread hepatitis C when shared.

- Sharing supplies used to prepare, inject, inhale, or smoke drugs can spread hepatitis C. This includes surfaces, straws, pipes, spoons, ties, cookers, filters or other supplies.
- Sharing or reusing syringes increases the chance of spreading the hepatitis C virus.

Scan the QR code to find a Syringe Services Program near you:

GET TESTED :

Many syringe services programs test for hepatitis C.

GET TREATMENT :

There is a **cure** for hepatitis C.

DON'T WAIT:

The longer someone goes without treatment, the more damage could be done to their liver, often with NO symptoms.
