SUPpoRT-A Overview

Kentucky Overdose Response Effort

April 2026

Kentucky Overdose Response Effort (KORE)

Our areas of focus:

Prevention

Treatment

Recovery

Kentucky Overdose Response Effort (KORE)

30.2%
in
2024!

Our ultimate goal is to

**REDUCE
OVERDOSE
DEATHS**

What is the SUPpoRT?

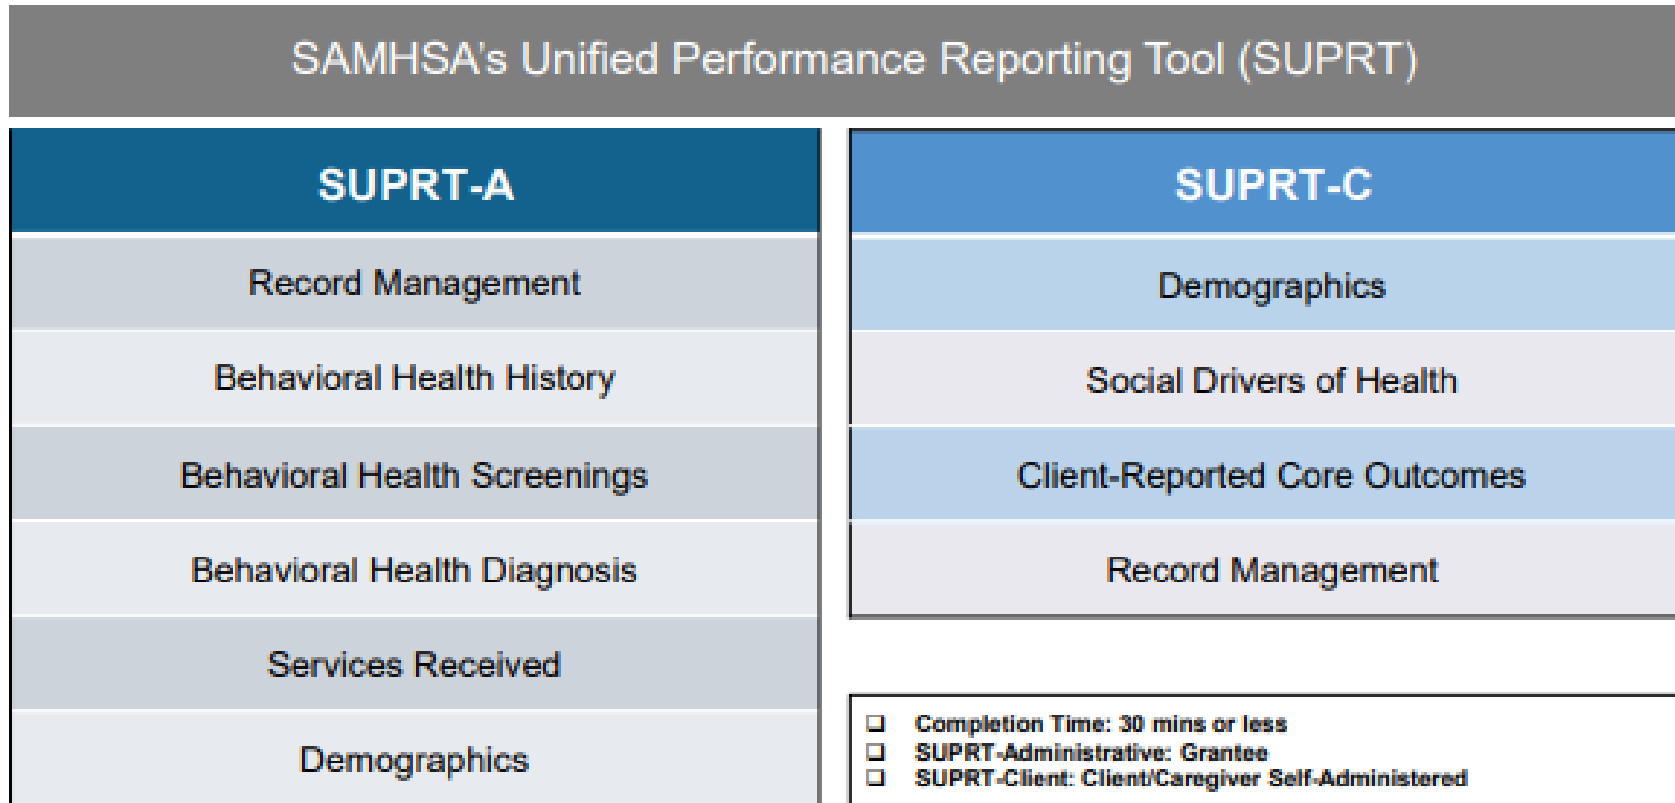

"SAMHSA Unified Performance Reporting Tool"

There are two different SUPpoRT tools:

- SUPpoRT A – Administrative Tool
 - SUPpoRT C – Client Tool

Overview of SUPpoRT – A/C

Today's presentation will focus on the SUPpoRT-A tool.
SUPpoRT-C is coming! We will release information when the development is ready.

Why the Change?

- Government Performance and Results Act (GPRA) is a federal mandate requiring federal agencies (like SAMHSA) to set goals, measure performance, and report results.
- As of October 1, 2025, SAMHSA has shifted the GPRA measurement tool to the SAMHSA Unified Performance Reporting Tool (SUPpoRT).
- The SUPpoRT tool is designed to reduce reporting burden, increase reporting accuracy, and drive alignment with SAMHSA's 2023-2026 Strategic Priority Area goals and objectives.

Major Changes

- The SUPpoRT-A is completed by grantee staff on behalf of the client. It is NOT an interview.
- Use the client's Electronic Health Record or other client recordkeeping systems to fill out the SUPpoRT-A.
- Client does not have to be present while the SUPpoRT-A is being filled out.

Who should have a SUPpoRT-A completed on their behalf?

ALL clients who:

- Receive KORE-funded services
- Have an Opioid Use Disorder (OUD) and/or Stimulant Use Disorder (StimUD)
- Live in Kentucky

SUPpoRT-A Data Collection Requirements

- **Baseline:** Collect within 30 days after first service.
- **Reassessment:** Collect within 30 days before or after the 6-month anniversary of the SUPpoRT-A baseline.
- **Annual:** Collect within 30 days before or after the 12-month anniversary of the SUPpoRT-A baseline.
- **Closeout:** Collect when the client discontinues grant services.

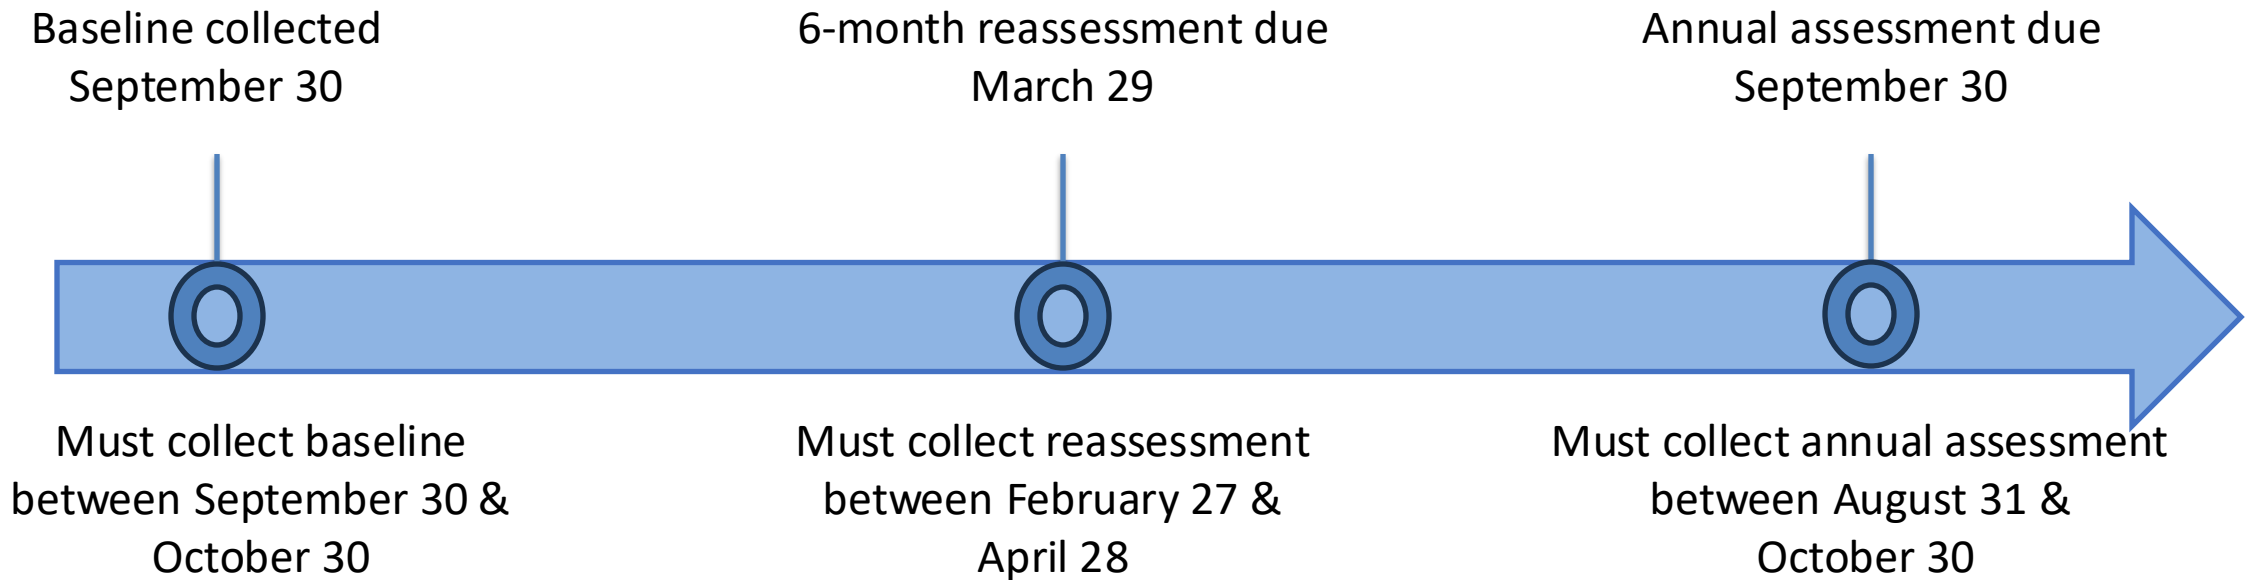

SUPpoRT-A Data Collection Requirements

- All completed assessments must be entered into the KORE Data Capture system within 30 days of completion.
- Reassessments and annual assessments are not required if the closeout assessment is complete.
- Complete a new baseline if a client returns after a closeout is completed.
- The expected completion rate for the SUPpoRT-A assessment is 100%.

SUPpoRT-A Data Collection Example

First Service Date: **October 1**
